

# OUTERWEAR FIT/FEATURES GUIDE: THE BEST FITS IN THE INDUSTRY. A TECH STORY YOU CAN UNDERSTAND.

## WATERPROOFING/BREATHABILITY

**WATERPROOFING** of fabric, in thousands of millimeters. This is a relative measure that indicates the height of a column of water that can be suspended above the fabric before water seeps through. **Higher number = more waterproof fabric.**

**BREATHABILITY** of fabric, measured in thousands of  $g/m^2/24hrs$ . This number is a relative measure that indicates the amount of moisture that will pass through one square meter of fabric in 24 hours. **Higher number = more breathable.**

## SEAM TAPING

**FULLY TAPED** indicates that all of the garment's seams have been taped to prevent moisture from entering at the seams. Fully Taped garments are the most waterproof option.

**CRITICALLY TAPED** indicates that only the most critical seams of the garment have been seam taped. By sealing only critical seams, the end garment is less expensive but still very waterproof for normal use in snow.

## INSULATION

**INSULATION** is measured in grams. Higher number = More insulation.

**INSULATED** jackets provide more core heat retention than shells, and are comparatively warmer. Airblaster Jackets with 60 -150 grams insulation are considered medium insulation. Jackets with more than 150 grams of insulation are considered heavy insulation.

**SHELL** jackets provide maximum breathability. They have no insulation sewn into the jacket, allowing the user to customize the insulation by adding or subtracting layers worn underneath the shell. When combined with effective layering, shell jackets offer maximum versatility in a wide range of temperatures and conditions.

## JACKET FITS

**SLIM FIT:** Our slimmest fitting jacket, closest to your street-style jacket fit.

**TAILORED FIT:** Not too tight, not too loose... just right. Slightly slimmer than traditional snowboard jackets, Airblaster Tailored Fit jackets have generous length in the arms and body, to keep you covered and looking good.

**TAILORED LONG:** Same fit as above, with additional length in the body.

**CLASSIC FIT:** Traditional snowboard jacket cut with adequate width in the arms and body, for ease of movement and easy layering. Not overly baggy unless you size up.

## PANT FITS

**SLIM FIT:** Our slimmest pant fit, closest to your street-style pant fit. Developed with Nick Dirks for the original Sissy Pant.

**TAILORED FIT:** Not too tight, not too loose... just right. They taper in slightly at the knee, but still allow unrestricted freedom of movement. Our Tailored Fit was developed for the original Hip Bag Pant.

**CLASSIC FIT:** Traditional snowboard pant fit with a straight leg, for maximum freedom of movement. Not overly baggy, unless you size up.

\*All Airblaster Women's Outerwear styles use the same fit descriptions as Men's styles, however all Women's styles incorporate a Women's-specific fit. Airblaster Women's fits are designed and developed by our female designer and the Women of the Airblaster Team.
